

# **TIBCO Cloud Spotfire (Analytics Solution)**

## **Prerequisites:**

- Valid TIBCO Cloud Integration Subscription
- MySQL Connection is created in TIBCO Cloud Integration
- Required Tables are created in the Database (DDL Scripts are provided)
- SmartContract\_Analytics app is deployed and running

## **Steps to setup Analytics Application**

1. A pre-configured Spotfire dashboard (SmartContract\_Analytics.dxp) is provided under ../src/spotfire/ directory of the zip file.
2. Login to your TIBCO Cloud Spotfire subscription.
3. Select Browse local file option and upload the .dxp file
4. Users can edit, update and enhance the current dashboard per specific requirement(s).
5. Sample data is embedded into the dxp for reference. The steps to add your database are provided here -
