

## Case Manager Workflow (Custom UX)

The CASE MANAGER WORKFLOW is our custom made UX solution for seamless interaction and management of the **Contract Translation** process. This solution allows you to review and manage all the cases created and approve them if you're ok with the translated contract.

### Prerequisites:

- Node.js installed else if not installed follow this guide to install Node <https://nodejs.org/en/download/package-manager/>
- Download Smart Contract Automation UI.zip file, unzip it. It contains the angular codebase needed for the UX solution.

### Steps to run UX solution

1. Once you have downloaded the Smart Contract Automation UI.zip file extract the file using any zip manager.
2. Now go inside the directory and open a command prompt in case of windows or terminal in case of MAC or LINUX.
3. Check if you have node installed by using the command **node -v** if you have node installed in your system properly it should show the output as below :

```
sharishc@sharishc-mbp ~ % node -v
v14.16.0
sharishc@sharishc-mbp ~ %
```

4. Now in the same command window run command **npm i** the command should install all the necessary modules .
5. Once the previous command is successfully executed run the following command :  
**npm run start**

You should see the output as below :

```
sharishc@sharishc-MBP Smart Contract Automation UI % npm run start
> argon-design-system-angular@1.2.0 start /Users/sharishc/Documents/Smart Contract Automation UI
> ng serve
